

positive regulation of protein catabolic process		regulation of metabolic process		positive regulation of biosynthetic process		positive regulation of cellular biosynthetic process		glial cell differentiation		astrocyte development	
positive regulation of macromolecule biosynthetic process		regulation of catabolic process		regulation of cellular biosynthetic process		regulation of gene expression		astrocyte differentiation		gliogenesis	
positive regulation of protein catabolic process								glial cell differentiation			
positive regulation of metabolic process		regulation of macromolecule biosynthetic process		regulation of primary metabolic process		regulation of proteolysis		negative regulation of nervous system development		regulation of multicellular organismal development	
regulation of biosynthetic process		regulation of macromolecule metabolic process		regulation of protein catabolic process		positive regulation of catabolic process		glial cell development		regulation of cell development	
								negative regulation of cell development			
artery development		gene expression		negative regulation of catalytic activity		epithelium development		positive regulation of inflammatory response
