

A diagram showing three cellular compartments. The top-left compartment is a reddish-orange rectangle labeled 'secretory granule'. The top-right compartment is a lighter orange rectangle labeled 'secretory vesicle'. The bottom compartment is a pink rectangle labeled 'intracellular vesicle'. A vertical line separates the top two compartments, and a horizontal line separates them from the bottom compartment. The label 'secretory granule' is also placed on the vertical line between the top two compartments.

secretory granule
