

metabolic process	positive regulation of RNA metabolic process	regulation of DNA-templated transcription	regulation of macromolecule metabolic process	DNA-templated transcription	regulation of transcription by RNA polymerase II
positive regulation of DNA-templated transcription	regulation of metabolic process	regulation of RNA biosynthetic process	regulation of RNA metabolic process	DNA-templated transcription	regulation of transcription by RNA polymerase II
positive regulation of nucleobase-containing compound metabolic process	regulation of nucleobase-containing compound metabolic process	regulation of cellular metabolic process	regulation of gene expression	negative regulation of transcription by RNA polymerase II	negative regulation of transcription by RNA polymerase II
positive regulation of RNA biosynthetic process	regulation of primary metabolic process			RNA biosynthetic process	
developmental growth involved in morphogenesis	developmental growth	positive regulation of biological process	positive regulation of cellular process	positive regulation of developmental process	negative regulation of catalytic activity
involved in morphogenesis	positive regulation of developmental growth	positive regulation of multicellular organismal process	positive regulation of multicellular organismal process	regulation of developmental process	
regulation of developmental growth	regulation of developmental growth	positive regulation of multicellular organismal process		response to nutrient
