

positive regulation of biosynthetic process	positive regulation of macromolecule biosynthetic process	regulation of gene expression	negative regulation of nervous system development		negative regulation of neurogenesis
positive regulation of cellular biosynthetic process	positive regulation of cellular biosynthetic process	regulation of cellular biosynthetic process	negative regulation of nervous system development		
positive regulation of gene expression	cellular metabolic process	regulation of cellular metabolic process	regulation of nervous system development	regulation of neurogenesis	
intracellular transport		lipid localization	macromolecule catabolic process	protein catabolic process	cellular response to stress
positive regulation of lipid localization	macromolecule localization		catabolic process		regulation of signaling
negative regulation of cell development	negative regulation of cellular component organization		positive regulation of cellular process	regulation of cell communication	
negative regulation of cell differentiation	negative regulation of developmental process			amyloid-beta clearance
