

anatomical structure morphogenesis	regulation of multicellular organismal development	regulation of nervous system development	positive regulation of DNA-templated transcription	positive regulation of RNA biosynthetic process	positive regulation of nucleobase-containing compound metabolic process
regulation of anatomical structure morphogenesis	regulation of developmental process	regulation of neurogenesis	positive regulation of RNA metabolic process	positive regulation of RNA biosynthetic process	regulation of nucleobase-containing compound metabolic process
regulation of cell development	neurogenesis	negative regulation of cell development	regulation of transcription by RNA polymerase II	positive regulation of macromolecule biosynthetic process	regulation of DNA-templated transcription
developmental growth	growth	regulation of developmental growth	epithelium development	endothelium development	cell motility
positive regulation of developmental growth	developmental growth involved in morphogenesis	positive regulation of growth	epithelial tube morphogenesis	endothelial cell differentiation
